Work Experience: Current

Child and Youth Worker

Role: Goal is to use psychological principles and model to alleviate ACE/Trauma

- Behavioral modification
 - Modify negative behavior such as (self harm and verbal outburst) and replace them with positive behavior
- Harm reduction model
 - Acknowledge the role of addiction and offer support to reduce addictive behavior rather than stigmatizing
- Incentive theory
 - Incentive driven application such as money incentive such as allowance to encourage life skills
- Reinforcement
 - Positive reinforcement to improve positive behavior such as rewards (dinner/bus tickets) for completing a task

Work Experience: Past

Disability Practitioner

Social Skills

- Community outing
- Events could be trivia such as bowling, going to the gym, cinemas or major events such as
- Social event based on their culture, background and religion
- Pow-Wow for indigenous client

Life skills and Activities of Daily Living

- Promote positive life skills like budgeting, cooking and cleaning skills
- Administer medication, track narcotics count
- Involved in ISP (individualized service plan) for my youth along with social worker, supervisor and PDD (person with developmental disorder) case- worker

Career Goal

Previous aspiration was to be a physician/surgeon. However, with the exorbitant amount of loans, 4-year residency onslaught that is highly stressful and lifestyle imbalance. I had a change of occupation.

Objective goals: Get into a PhD program in data science. My analysis show my ROI is high which take into consideration my previous academic background, glass ceiling, opportunity cost, stress level, lifestyle and hobbies

Subjective goals: Use Data science to address social economic disparity affecting the truly vulnerable individuals

Interesting fact and Hobbies

PLAY MUSICAL
INSTRUMENT

ACTIVE LIFESTYLE

PLAY PICKUP SPORT
AT A HIGH LEVEL

PERSONALITY: INTRO-
EXTROVERSION.
